CAREER OBJECTIVE

I am a B.Tech (CSE) student passionate about Software Engineering and Web Development, specializing in MERN Stack, AI, and Full-Stack Development. With expertise in C++, Python, JavaScript, and modern frameworks like React.js and Node.js, I build scalable and efficient applications.

WORK EXPERIENCE

Full Stack Web Development With MERN. • Internship

Feb 2025 - Mar 2025

EduNet Foundation, In Collaboration With EY GDS & AICTE, Virtual

- We are looking for a passionate MERN Stack Web Development Internship to join our team. This internship will provide hands-on experience in designing, developing, and deploying web applications using MongoDB, Express.js, React.js, and Node.js. You will work alongside experienced developers and contribute to real-world projects.
- Develop, test, and maintain full-stack web applications using the MERN stack.
- Collaborate with designers, developers, and project managers to create scalable web solutions.
- Optimize applications for performance and responsiveness.

A Joint CSR Initiative Of Microsoft & SAP, Focusing On AI Technologies. • Internship

Jan 2025 - Feb 2025

Microsoft & SAP, AICTE, And EduNet, Virtual

- The TechSaksham Initiative is a joint Corporate Social Responsibility (CSR) effort by Microsoft and SAP aimed at empowering students with cutting-edge AI technologies. This internship provides an opportunity to gain hands-on experience in Artificial Intelligence (AI), Machine Learning (ML), and Data Science, helping students develop industry-relevant skills.
- Learn and work on AI-driven applications with real-world impact.
- Gain exposure to Machine Learning models, Data Processing, and Cloud AI services.

PROJECTS

[A Service for Delivering Food \(Zomato Clone\) with MERN Technology ↗](#)

Feb 2025 - Mar 2025

- Developed a full-stack food delivery web application using MERN (MongoDB, Express, React, Node.js). This platform allows users to explore restaurants, place orders, make secure payments, and track deliveries in real-time.

[Image Generation Using Stable Diffusion And Comfy UI ↗](#)

Jan 2025 - Feb 2025

- This project leverages Stable Diffusion, a state-of-the-art AI model, for generating high-quality images from text prompts. Using ComfyUI, a powerful and modular node-based interface, we design customizable workflows for fine-tuned image synthesis.
